Dear Tareq

We have found the experience and skill at Prime Satcom Consulting invaluable in developing our business. Although we already have a long standing record of manufacturing and supplying satellite communication solutions around the world, we have found that the detailed knowledge of satellite communication systems in general, and DVB-RCS systems in particular, coupled with a wealth of contacts and directly relevant information aptly compliments our skills.

It is reassuring that when we agree a 'brief' with Prime Satcom Consulting for work to be completed, we can rely on them to deliver what is required with the minimum of fuss, whilst keeping us informed of and discussing the salient details as the work progresses.

Ian Jones
Managing Director
Orbit Research Ltd
